Dopo anni di esperienza nell'industria dei semafori per ambienti privati, Stagnoli è fiero di introdurre un nuovo pannello di controllo che può soddisfare tutte le richieste degli installatori. Dalla gestione integrata del tempo alla gestione delle aree per un massimo di 10 semafori per ogni installazione. Tutte queste caratteristiche sono state migliorate grazie a una tecnologia 2.0 senza l'aiuto di terze App. Ti basta semplicemente usare la rete wi-fi interna inclusa nel pannello Saturno.

From years of experience in the manufacturing of traffic lights for private purposes, Stagnoli is proud to introduce a new control board which can satisfy any request from any installer. From the embedded management of times to management of areas for a maximum of 10 traffic lights for each installation. All this features enhanced by a 2.0 technology without third-part Apps. You can just use the internal wi-fi network included in the board Saturno.

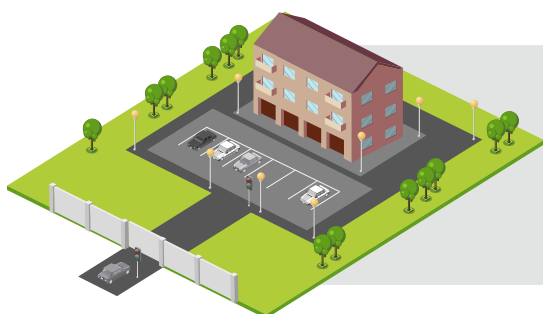

Après des années d'expérience dans le secteur des feux de signalisation destinés aux environnements privés, Stagnoli est fier de présenter un nouveau panneau de commande pouvant satisfaire toutes les demandes des installateurs. De la gestion du temps intégrée à la gestion de zone pour 10 feux de signalisation maximum par installation. Toutes ces fonctionnalités ont été améliorées grâce à la technologie 2.0 sans l'aide d'applications tierces. Utilisez simplement le réseau wi-fi interne inclus dans le panneau Saturn.
